

## Seidio Delivers Mobile Accessory Collection for the Samsung Galaxy S6

*Full line provides a variety of styles, color, and protection to fit each user's specific needs*

**HOUSTON – April 9, 2015** – Seidio, a leader in professional mobile accessories, is excited to outfit the new Samsung Galaxy S6 with its line of cases and screen protectors that vary in style and protection level, but all meet Seidio's exceptional standards. The current collection includes the newly designed SURFACE, DILEX Pro, LEDGER, and TETRA Pro. Additional cases will become available in the following months as well.

The **[TETRA Pro](#)** (**\$39.95**) is for the minimalist user. It provides protection, but with the slim profile of a CNC-machined aluminum bumper case. The durable TPU frame protects the edges from drops, and the scratch-resistant back panel also prevents potential damage. Additionally, the beveled edges keep the device from touching surfaces for extra protection. It is estimated to be available in mid-April.

The signature **[SURFACE](#)** (**\$29.95**) has been revamped to include an interior TPU layer that features Seidio's new Hexguard™ technology which boasts a honey-comb pattern for extra padding in case of an accidental drop or fumble. An exterior Polycarbonate layer also defends against scratches and abrasions while maintaining the original SURFACE's thin profile. As with all Seidio's cases, the SURFACE provides precision cutouts for easy access to all ports and controls. It is estimated to be available in mid-April.

The **[DILEX Pro](#)** (**\$34.95**) provides shock absorbing protection with two interlocking layers that snap into place yet maintains a thin profile (only 2.2mm). Inside, the user will notice Seidio's Hexguard™ honeycomb layer of protection for extra cushioning. A built-

in metal kickstand on the back of the DILEX Pro allows the user to view multimedia in landscape orientation. It is estimated to be available in mid-April.

Finally, the [LEDGER \(\\$34.95\)](#) is a unique flip case that combines form and function. First, it safeguards the device against scratches, bumps, and abrasions from all angles including the flip cover that protects the screen. The flip cover also provides an added level of privacy. The Italian Polyurethane cover also folds up so the user can view the device hands-free. On the interior, the user will find a convenient card slot to store a credit card or ID. It is estimated to be available in late April.

In addition, Seidio's Spring Clip Holster and its [Ultimate Screen Protector](#), a durable guard for your screen, are available today. Seidio will also continue to bring more accessories for the Samsung Galaxy S6 in the coming months.

Looking ahead for the Samsung Galaxy S6 Edge, the LEDGER will be available in mid to late April, and the DILEX Pro will begin shipping in late April.

### **About Seidio, Inc.**

Founded in 2002 and based out of Houston, Seidio is a leading manufacturer of premium mobile technology accessories designed for the mobile professional.
